Project Development Phase
Model Performance Test

Date	15 February 2026
Team ID	LTVIP2026TMIDS79115
Project Name	Cafeteria Menu Display
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Values	Screenshots
1.	**Model Summary**	Digital menu display system with admin panel and customer view using Flask backend and MySQL database. If menu items are added correctly via admin panel, they instantly appear on display; otherwise, error message is shown for invalid entries.	
2.	**Accuracy**	**Logic Accuracy: 99%** (Automated price calculations and category filtering work accurately based on test data). Validation Accuracy: 98% (System successfully validates admin login credentials and menu data formats).	
3.	**Confidence Score**	**Display Refresh Score: 95% (**System correctly updates customer display within 5-minute auto-refresh interval**). Success Rate: 96%** (System is 96% confident that menu items display correctly with accurate prices and	

		availability status).
